### **DETAILED ACTION**

1. Claims 1-31 are pending.

#### ***Restriction***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted:

I. Claims 1-22 are drawn to a method for altering the level of hematopoietic progenitor cell adhesion to target tissue.

II. Claims 23-30 are drawn to a method for screening a test compound for altering the level of hematopoietic progenitor cell adhesion to target tissue.

III. Claim 31 is drawn to a method for isolating hematopoietic progenitor cells from a tissue

The inventions listed as Groups I-III do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Pursuant to 37 C.F.R. § 1.475 (d), the ISA/US considers that where multiple products and processes are claimed, the main invention shall consist of the first invention of the category first mentioned in the claims and the first recited invention of each of the other categories related thereto. Accordingly, the main invention (Group I) comprises the first recited method for altering the level of hematopoietic progenitor cell adhesion to target tissue.

Further pursuant to 37 C.F.R. § (d), the ISA/US considers that any feature which the subsequently recited products and methods share with the main invention does not constitute a special technical feature within the meaning of PCT Rule 13.2 and that each of such products and methods accordingly defines a separate invention.
